

New Product Announcement - SHOP

August 7, 2026

2K Urethane Sealer

JP43X

Product Information:

SHOPLINE JP43X Series 2K Urethane Sealers are fast drying, two component sealers designed for today's automotive collision centers and are **oxsol free**. These **new** oxsol-free formulations deliver the **same proven performance characteristics** that customers have come to expect while providing enhanced regulatory flexibility and sustainability benefits.

These new sealers have been specifically developed to maintain the application, appearance, and performance standards of the current products, while eliminating Oxsol from the formulation. As a result, customers can benefit from:

- Compliance with National Rule regulatory requirements (Plus South Coast AQMD Rule 1151 Phase 1)
- Simplified product selection for customers operating in multiple markets
- Reduced regulatory and environmental concerns associated with Oxsol-containing products
- The same trusted Shopline performance and productivity in the body shop

This transition reinforces our commitment to providing solutions that help customers stay compliant without sacrificing quality, efficiency, or results. See the new codes below:
