Etch Primer & Etch Primer Catalyst

SX2071 / SX2072

Product Information :

ONECHOICE® SX2071 Etch Primer is a two-component acid-etch primer designed for use on properly prepared steel, aluminum, and galvanized metals. When combined with its dedicated catalyst, **SX2072**, it delivers excellent adhesion, corrosion protection, and fast-drying performance.

SX2072 is formulated without Oxsol and is compliant with all North America VOC regulations. The **SX2071/SX2072** system replaces SX1071/SX1072.

Features & Benefits:

- **Fast-drying formula** to support productivity
- **Strong adhesion** to most metal substrates
- **Reliable corrosion protection** for long-term durability
- **Formulated without Oxsol** for improved safety and compliance
