

AUTOMOTIVE REFINISH PRODUCT ANNOUNCEMENT

ENVIROBASE® HIGH PERFORMANCE

Date: July 10, 2019

ECS8X A-Chromatic Sealers

Product Information:

ECS8X A-Chromatic Sealers deliver an exceptional foundation for the ENVIROBASE® High Performance basecoat system. A smooth surface and minimal texture in the blend edge allows the basecoat to lay flatter than ever before. The three ECS8x series sealer colors are scientifically designed to blend into the five A-Chromatic gray shades. An improved foundation coupled with the appropriate gray shade undercoat will achieve invisible repairs with less basecoat material, as well as maximize hold out and final appearance.

ECS8X A-Chromatic Sealers were created to replace ECS2X and ECS6X Sealers.

Marketing Information:

- Convenient 4:1:1 Mix Ratio.
- Available in three A-Chromatic shades, G1 white, G5 gray, G7 dark gray can be blended into G3 & G6.
- Significantly improved blend edge, resulting in a smoother finish for the basecoat layer.
- Use with ECRXX reducers in all markets or compatible with DELTRON® DBC 2000 and GLOBAL REFINISH SYSTEM® reducers in National Rule areas.
