CHROMATIC VARIANT DECKS

Thousands of the latest color variants and primes, covering both domestic and import vehicles. Chips are sprayed with actual finish paint.

RAPIDMATCH™ X-5 SPECTROPHOTOMETER

Combining advanced optics and multi-angle color measurement, this tool reads the actual vehicle color and assists in finding the best blendable match.

PAINT IT DIGITAL COLOR TOOL

This online application of visual color chips makes it easy to search and identify the correct color for a repair when the OEM code is unknown.

COLOR INFORMATION BOOKS

Published annually, these comprehensive OEM reference guides enable quick, accurate color identification.

TOUCHMIX® HARDWARE

Working seamlessly with our *PaintManager* software, this touch screen mixing station reduces over-pours and waste while increasing efficiency.

ONLINE COLOR FORMULATIONS

Updated daily, the PPG global database offers over 2 million color formulas for import and domestic vehicles, covering all PPG and NEXA AUTOCOLOR® brands.

COLORMOBILE® APPLICATION

Compatible with most tablets and smartphone devices, this mobile application offers fast access to the latest prime, variant and special field formulas.

TINT CHARTS

When a color requires tinting, these posters are invaluable for isolating color properties of specific toners.

PAINTMANAGER® SOFTWARE

A powerful tool for both managers and paint technicians, this management reporting and formula retrieval application offers everything needed to operate an efficient paint operation
